

**Save money, time and gas  
by switching to electricity**

Powered by Braintree Electric Light Department, Braintree Drives Electric (BDE) is a local initiative designed to share the benefits of electric vehicles with Braintree residents, and facilitate access to rebates and incentives

## Top 5 reasons Braintree is switching to EVs

- 1. SAVE MONEY** With a fully electric vehicle or a plug-in hybrid, driving on electricity equals approximately, \$1.30-\$1.50 per gallon of gas.
- 2. SAVE MORE MONEY** BDE will connect you to offers from local dealers and generous state rebates that allow you to lease a vehicle at competitive rates.
- 3. SAVE EVEN MORE MONEY** Other than wiper blades and tires, electric vehicles require minimal maintenance. Even the brake pads last longer in an EV, thanks to the regenerative braking function.
- 4. PROTECT THE CLIMATE** An electric vehicle prevents twice the amount of atmospheric carbon than a residential solar power system. It's an easy way to do your part for the environment!
- 5. HELP BRAINTREE REACH ITS GOALS** Braintree and the Commonwealth of Massachusetts have made adoption of electric vehicles a priority. Help Braintree be a leader in electric vehicle usage!
